

# Respond and record as one

Integrated body cameras, video remote speaker microphones and in-car video systems

When your team is in the field, anything can happen in the blink of an eye. As a situation unfolds, it's crucial to have a complete view of the incident - so supervisors can arrange the necessary backup in the moment, and evidence technicians can build a compelling case easily after the fact.

## How it works

When products collaborate, you multiply your community's safety and security. Our in-car video system works together with body cameras and video remote speaker microphones to capture every angle of a critical incident, so you can respond quickly and efficiently, hands-free. When configured as a "group" of up to eight devices, officers can trigger recording and streaming from multiple cameras instantaneously, as soon as one has been activated. This ensures your agency can capture clear audio and video playback from multiple angles - so incidents are handled with ease, start to finish.

## Key benefits

### Effortless recording

Capture critical incidents effortlessly with automatic recording triggers between in-car video systems, body cameras and video remote speaker microphones.

### Keep tabs on your team

Enhance officer safety with real-time video and location tracking to maintain situational awareness during an incident.

### Present a stronger case

Easily collate all evidence in one location, and use synchronized footage playback and powerful AI redaction to prepare your case for the judicial system.

# Key products and features

## V700 body camera

Safeguard your reputation and maintain the trust of your community by capturing secure, unbiased video evidence of every citizen interaction. Our V700 body camera is designed specifically with your agency's needs in mind - from LTE capabilities and a rugged exterior, to a long battery life which extends beyond just a 12-hour shift.

## SVX video remote speaker microphone

Transform what it means to be on the front line with a converged device which combines the best of our mission-critical audio and trusted body-worn video, without compromise. Capture radio communications, radio metadata and evidential video simultaneously, to show how key decisions were made during an incident.

## M500 in-car video system

Capture the full picture from all sides of your vehicle - inside and out. Rely on up to five purpose-built evidential cameras, ranging from an ALPR-enabled front camera to an infrared cabin camera which starts recording automatically when a person is detected in the back seat. This comprehensive setup obtains as much context as possible to provide your team with a complete view for complete protection.

## Solving for safer

At Motorola Solutions, we build and connect technologies to help protect people, property and places. Our solutions enable the collaboration between public safety agencies and enterprises that's critical for a proactive approach to safety and security.
